All components in these kits are guaranteed to be Japanese brand.

Many of the components will meet or exceed the OEM units found originally in your Japanese vehicle.

We take great care in sourcing these quality and high end part components. We build these kits with all the necessary pieces needed to complete a timing belt service without the guess work.

Each piece in these kits are a necessary component. Pieces big and small all have a job and purpose and from our vast experience, leaving out a component can cause problems down the road and shorten the life of the timing belt and components.
